In addition, as at 30 June 2025, the Group has 6 joint ventures and associates as disclosed in Note 8.1.

# Transimex Corporation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)  
For the second quarter of the fiscal year ending 31 December 2025

## 2. BASIS OF PREPARATION

### 2.1 *Accounting standards and system*

The consolidated financial statements of the Group, expressed in Vietnam dong (“VND”), are prepared in accordance with the Vietnamese Enterprise Accounting System and Vietnamese Accounting Standards issued by the Ministry of Finance as per:

- Decision No. 149/2001/QD-BTC dated 31 December 2001 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 1);
- Decision No. 165/2002/QD-BTC dated 31 December 2002 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 2);
- Decision No. 234/2003/QD-BTC dated 30 December 2003 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 3);
- Decision No. 12/2005/QD-BTC dated 15 February 2005 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 4); and
- Decision No. 100/2005/QD-BTC dated 28 December 2005 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 5).

Accordingly, the accompanying consolidated financial statements, including their utilisation are not designed for those who are not informed about Vietnam’s accounting principles, procedures and practices and furthermore are not intended to present the consolidated financial position and consolidated results of operations and consolidated cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

### 2.2 *Applied accounting documentation system*

The Group’s applied accounting documentation system is the General Journal system.

### 2.3 *Fiscal year*

The Group’s fiscal year applicable for the preparation of its consolidated financial statements starts on 1 January and ends on 31 December.

The second quarter of the year 2025 began on 01 April and ended on 30 June.

### 2.4 *Accounting Currency*

The consolidated financial statements are prepared in VND which is also the Group’s accounting currency.

### 2.5 *Basis of consolidation*

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries for the first quarter of the fiscal year ending 31 December 2025.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continued to be consolidated until the date that such control ceases.

The financial statements of the subsidiaries are prepared for the same reporting year as the Company, using consistent accounting policies.

All intra-company balances, income and expenses and unrealised gains or losses result from intra-company transactions are eliminated in full.

Non-controlling interests represent the portion of profit or loss and net assets not held by the Group and are presented separately in the consolidated income statement and within equity in the consolidated balance sheet, separately from parent shareholders’ equity.

Impact of change in the ownership interest of a subsidiary, without a loss of control, is recorded in undistributed earnings.

# Transimex Corporation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)  
For the second quarter of the fiscal year ending 31 December 2025

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### 3.1 *Cash and cash equivalents*

Cash and cash equivalents comprise cash on hand, cash in banks, cash in transit and short-term highly liquid investments with an original maturity of less than three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

### 3.2 *Inventories*

Inventories are measured at their historical costs. The cost of inventories comprises costs of purchase, costs of conversion (including raw materials, direct labor cost, other directly related cost, manufacturing general overheads allocated based on the normal operating capacity) incurred in bringing the inventories to their present location and condition.

In case the net realizable value is lower than the original price, it must be calculated according to the net realizable value.

Net realisable value (“NRV”) represents the estimated selling price in the ordinary course of business less the estimated costs to complete and the estimated costs necessary to make the sale.

The perpetual method is used to record inventories, which are valued as follows:

- |                          |   |
|--------------------------|---|
| Tools and supplies, fuel | - cost of purchase on a weighted average basis  |
| Work-in-process          | - external services and labor plus attributable overheads based on the normal operating capacity. |

#### *Provision for obsolete inventories*

An inventory provision is created for the estimated loss arising due to the impairment of value (through diminution, damage, obsolescence, etc.) of raw materials, finished goods, and other inventories owned by the Group, based on appropriate evidence of impairment available at the consolidated balance sheet date.

Increases or decreases to the provision balance are recorded into the cost of goods sold account in the consolidated income statement. When inventories are expired, obsolescence, damage or become useless, the difference between the provision previously made and the historical cost of inventories are included in the consolidated income statement.

### 3.3 *Receivables*

Receivables are presented in the consolidated financial statements at the carrying amounts due from customers and other debtors, after the provision for doubtful debts.

The provision for doubtful debts represents amounts of outstanding receivables at the consolidated balance sheet date which are doubtful of being recovered. Increases or decreases to the provision balance are recorded as general and administrative expenses in the consolidated income statement. When bad debts are determined as unrecoverable and accountant writes off those bad debts, the differences between the provision for doubtful receivables previously made and historical cost of receivables are included in the consolidated income statement.

### 3.4 *Tangible fixed assets*

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of a tangible fixed asset comprises its purchase price and any directly attributable costs of bringing the fixed asset to working condition for its intended use.

Expenditures for additions, improvements and renewals are added to the carrying amount of the assets and expenditures for maintenance and repairs are charged to the consolidated income statement as incurred.

When tangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the consolidated income statement.

# Transimex Corporation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)  
For the second quarter of the fiscal year ending 31 December 2025

## 3.5 *Leased assets*

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

A lease is classified as a finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee. All other leases are classified as operating leases.

Where the Group is the lessee

Assets held under finance leases are capitalised in the consolidated balance sheet at the inception of the lease at the fair value of the leased assets or, if lower, at the net present value of the minimum lease payments. The principal amount included in future lease payments under finance leases are recorded as a liability. The interest amounts included in lease payments are charged to the consolidated income statement over the lease term to achieve a constant rate on interest on the remaining balance of the finance lease liability.

Capitalised financial leased assets are depreciated using straight-line basis over the shorter of the estimated useful lives of the asset and the lease term, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term.

Rentals under operating leases are charged to the consolidated income statement on a straight-line basis over the lease term.

Where the Group is the lessor

Assets subject to operating leases are included as the Group's fixed assets in the consolidated balance sheet. Lease income is recognized in the consolidated income statement on a straight-line basis over the lease term.

## 3.6 *Intangible fixed assets*

Intangible fixed assets are stated at cost less accumulated amortisation.

The cost of an intangible fixed asset comprises its purchase price and any directly attributable costs of preparing the intangible asset for its intended use.

Expenditures for additions, improvements are added to the carrying amount of the assets and other expenditures are charged to the consolidated income statement as incurred.

When intangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the consolidated income statement.

Land use rights

Land use rights are recorded as intangible fixed assets representing the value of the right to use the land acquired by the Group.

## 3.7 *Depreciation and amortisation*

Depreciation of tangible fixed assets and amortisation of intangible fixed assets are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Buildings and structures	5 – 50 years
Machinery and equipment	3 – 20 years
Means of transportation	3 – 15 years

Office equipment	3 – 15 years
Computer software	3 – 7 years

Land use rights with indefinite useful life are not amortised.

# Transimex Corporation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)  
For the second quarter of the fiscal year ending 31 December 2025

## 3.8 *Investment property*

Investment property is stated at cost including transaction costs less accumulated depreciation. Investment property held for capital appreciation is not depreciated but subject to impairment review.

Subsequent expenditure relating to an investment property that has already been recognised is added to the net book value of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Group.

Depreciation and amortization of investment properties are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Building and structures 20 – 30 years

Investment properties are derecognized when either they have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the assets is recognised in the consolidated income statement in the period of retirement or disposal.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by ending of owner-occupation, commencement of an operating lease to another party or ending of construction or development. Transfers are made from investment properties when, and only when, there is change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale. The transfer from investment property to owner-occupied property or inventories does not change the cost or the carrying value of the property for subsequent accounting at the date of change in use.

## 3.9 *Borrowing costs*

Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

Borrowing costs are recorded as expense during the year in which they are incurred, except to the extent that they are capitalised as explained in the following paragraph.

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that necessarily take a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset.

## 3.10 *Prepaid expenses*

Prepaid expenses are reported as short-term or long-term prepaid expenses in the consolidated balance sheet and amortised over the period for which the amounts are paid or the period in which economic benefits are generated in relation to these expenses. Typical expenses are as follows:

- ▶ Tools and consumables with large value issued into construction and can be used for more than one year;
- ▶ Prepaid land rental;
- ▶ Prepaid insurance premium; and
- ▶ Land clearance,

### **Prepaid land rental**

The prepaid land rental represents the unamortised balance of advance payment made in accordance with the lease contract. According to Circular No.45/2013/TT-BTC issued by Ministry of Finance dated on 25 April 2013 guiding the management, use and depreciation of fixed assets (“Circular 45”), such prepaid rental is recognized as a long-term prepaid expense for allocation to the consolidated income statement over the remaining lease period.

# Transimex Corporation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)  
For the second quarter of the fiscal year ending 31 December 2025

## 3.11 *Business combinations and goodwill*

Business combinations are accounted for using the purchase method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange plus any costs directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination are measured initially at fair values at the date of business combination.

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost of the business combination over the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated income statement. After initial recognition, goodwill is measured at cost less any accumulated amortisation.

Goodwill is amortised over a 10-year period on a straight-line basis. The parent company conducts the periodical review for impairment of goodwill of investment in subsidiaries. If there are indicators of impairment loss incurred is higher than the yearly allocated amount of goodwill on the straight-line basis, the higher amount will be recorded in the consolidated income statement.

## 3.12 *Investments*

### *Investment in associates*

The Group's investment in associates is accounted for using the equity method of accounting. An associate is an entity in which the Group has significant influence that is neither subsidiary nor joint venture. The Group generally deems they have significant influence if they have over 20% of the voting rights.

Under the equity method, the investment is carried in the consolidated balance sheet at cost plus post acquisition changes in the Group's share of net assets in the associates. Goodwill arising on acquisition of the associate is included in the carrying amount of the investment. Goodwill is not amortised and subject to annual review for impairment.

The share of post-acquisition profit (loss) in the associates is presented the face of the consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividend receivable from associates reduces the carrying amount of the investment.

The financial statements of the associates are prepared for the same reporting period and accounting policies as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

### *Investment in joint ventures*

The Group's investment in a jointly controlled entity is accounted for using the equity method of accounting. Under the equity method, the investment is carried in the consolidated balance sheet at cost plus post joint venture changes in the Group's share of net assets of the jointly controlled entity.

The share of profit (loss) in the post-acquisition results of operation of the jointly controlled entity is presented on face of the consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividend and profit sharing receivable from jointly controlled entities reduces the carrying amount of the investment.

The financial statements of the jointly controlled entities are prepared for the same reporting period and use the same accounting policies as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

### *Held-for-trading securities and investment in other entities.*

Held-for-trading securities and investment in other entities is stated at their acquisition costs.

# Transimex Corporation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)  
For the second quarter of the fiscal year ending 31 December 2025

## *Held-to-maturity investment*

Held-to-maturity investment is stated at acquisition cost. After initial recognition, held-to-maturity investment is measured at recoverable amount. Any impairment loss incurred is recognised as expense in the consolidated financial statements and deducted against the value of such investment.

## *Provision for diminution in value of investments*

Provision of the investment is made when there are reliable evidences of the diminution in value of those investments at the balance sheet date.

Increases or decreases to the provision balance are recorded as finance expenses in the consolidated income statement.

### **3.13 Payables and accruals**

Payables and accruals are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Group.

### **3.14 Foreign currency transactions**

Transactions in currencies other than the Group's reporting currency of VND are recorded at the actual exchange rates at transaction dates which are determined as follows:

- Transactions resulting in receivables are recorded at the buying exchange rate of the commercial bank designated for collection;
- Transactions resulting in liabilities are recorded at the selling exchange rate of the commercial bank designated for payment; and
- Payments for assets or expenses without liabilities initially being recognized are recorded at the buying exchange rate of the commercial bank that processed these payments.

At the end of the year, monetary balances denominated in foreign currencies are translated at the actual exchange rates at the consolidated balance sheet date which are determined as follows:

- Monetary assets are translated at buying exchange rate of the commercial bank where the Group conducts transactions regularly; and
- Monetary liabilities are translated at selling exchange rate of the commercial bank where the Group conducts transactions regularly.

All foreign exchange differences incurred are taken to the consolidated income statement.

### **3.15 Treasury shares**

Own equity instruments which are reacquired (treasury shares) are recognized at cost and deducted from equity. No gain or loss is continued in profit or loss upon purchase, sale, issue or cancellation of the Group's own equity instruments.

### **3.16 Appropriation of net profit**

Net profit after tax (excluding negative goodwill arising from a bargain purchase) is available for appropriation to shareholders after approval in the annual general meeting, and after making appropriation to reserve funds in accordance with the Company's Charter and Vietnam's regulatory requirements.

The Group maintains the following reserve funds which are appropriated from the Group's net profit as proposed by the Board of Directors and subject to approval by shareholders at the annual general meeting:

#### ► *Investment and development fund*

This fund is set aside for use in the Group's expansion of its operation or of in-depth investments.

# Transimex Corporation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)  
For the second quarter of the fiscal year ending 31 December 2025

▶ *Bonus and welfare fund*

This fund is set aside for the purpose of pecuniary rewarding and encouragement, common benefits and improvement of the employees' benefits, and presented as a liability in the consolidated balance sheet.

### 3.17 *Earnings per share*

Basic earnings per share is calculated by dividing net profit after tax attributable to ordinary shareholders of the Company (after adjusting for the bonus and welfare fund) by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing the net profit after tax attributable to ordinary equity holders of the Group (after adjusting for interest on the convertible preference shares) by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

### 3.18 *Revenue recognition*

Revenue is continued to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, excluding trade discount, rebate and sales return. The following specific recognition criteria must also be met before revenue is continued:

*Sale of goods*

Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually upon the delivery of the goods.

*Rendering of services*

Revenue is recognized when the services had been performed and completed.

*Interest*

Revenue is recognised as the interest accrues (taking into account the effective yield on the asset) unless collectability is in doubt.

*Rental income*

Rental income arising from operating leases is accounted for on a straight-line basis over the lease term.

*Dividend*

Income is recognised when the Group's entitlement as an investor to receive the dividend is established.

### 3.19 *Taxation*

*Current income tax*

Current income tax assets and liabilities for the current and prior year are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted as at the balance sheet date.

Current income tax is charged or credited to the consolidated income statement, except when it relates to items continued directly to equity, in which case the current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Group to offset current tax assets against current tax liabilities and when the Group intends to settle its current tax assets and liabilities on a net basis.

# Transimex Corporation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)  
For the second quarter of the fiscal year ending 31 December 2025

## *Deferred tax*

Deferred tax is provided using the liability method on temporary differences at the balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are continued for all taxable temporary differences.

Deferred tax assets are continued for all deductible temporary differences, carried forward unused tax credit and unused tax losses, to the extent that it is probable that taxable profit will be available against which deductible temporary differences, carried forward unused tax credit and unused tax losses can be continue.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be continue. Previously continued and deferred tax assets are re-assessed at each balance sheet date and are continued to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is continue or the liability is settled based on tax rates and tax laws that have been enacted at the balance sheet date.

Deferred tax is charged or credited to the consolidated income statement, except when it relates to items continued directly to equity, in which case the deferred tax is also dealt with in the equity account.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Group to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on the same taxable entity or when the Group intends either to settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.
